

HOW TO CodeJam

11 APR 2024

What is CodeJam?

Solve the Challenges

Solve as many challenges as you can in the HackerRank competition within 5 hours. Solutions to harder questions will earn you more points.

Ranked on Points Scored

The number of points you have will determine how high you are on the leaderboard. Remember that you should be working out solutions individually.

In Any Language

You can pick any language that HackerRank supports, whether you like using Python, Java, C++ or Haskell.

Rules

- Competitors must **work individually** and submit only their own work. The use of AI assistance tools and technologies is prohibited, and committee reserve the right to disqualify any competitors using or suspected of using these tools.
- There is a limit of **one prize per person**.
- To be eligible for prizes, you must be a current university student, a current UQCS member, and registered on the HackerRank contest. Non-students (including alumni) and non-UQCS members can participate but will not be eligible for prizes.
- You are considered a first year student if this is your **first or second semester of university studies**.

Rules

NO CHATGPT. Just No.

Scoring

- Each challenge has a **pre-determined score**.
- A participant's score depends on the number of test cases a participant's code submission **successfully** passes.
- If a participant submits more than one solution per challenge, then the participant's score will reflect the **highest score** achieved.
- Participants are ranked by score. If two or more participants achieve the same score, then the tie is broken by the **sum of time** for the first success submission, from the start of the contest.
